A GRAND NEW BEAN.

NEW CALIFORNIA RUST PROOF DWARF WAX.

In this new variety introduced by us, we have the very best wax sort yet offered to Market Gardeners. It will sell twice as well and at a higher price than any other sort. The pods are longer, broader and of a brighter yellow color, very superior quality, tender and stringless. The vines are of vigorous growth, leaves dark green, hardy, and yield enormous quantities of large handsome flat meaty pods, borne well up from the ground, and has not shown any disposition to rust during the past three years. We particularly recommend this valuable new sort to all our market garden friends. Pkt. 10c.; pint 25c., quart 45c., ½ peck $1.45, peck $2.75.

CLEARED $251.00 FROM A PECK OF SEED.

James Grant, Goldsboro, N. C., June 30, 1893, writes:

From one peck of The New California Rust Proof Wax Beans, bought of you, I planted one acre and gathered the largest crop ever heard of in this section. They outsold all other varieties of wax beans in New York and Boston. I cleared $251.00 on this single acre of beans from your seed.
**ARTICHOKE.**

Mammoth White French. The wonderful productiveness and ease with which these artichokes can be produced is always a surprise to those who cultivate them for the first time. They are an excellent feed for cattle, sheep and hogs. Fed to milch cows, they equal bran in producing rich milk, but their greatest value is as food for hogs. Frequent and thorough feeding does not injure them. Three bushels will plant an acre. 1 lb. 30c., 4 lbs. $1.00; by express or freight, 1/2 bushel $1.00, bushel $2.50, barrel of three bushels $6.00, 3 or more barrels, $5.00 each. On good corn land they will produce from 200 to 1000 bushels per acre.

Jerusalem Artichoke. The roots make a nice relish. They live from year to year. They are largely used by York raisers for feeding as a cholera preventive. 1 lb. 30c., 3 lbs. 50c. by mail, blank, $1.00 by express or freight.

Large Green Globe. Cultivated for its flower heads, which are cooked like asparagus. Pkt. 10c., oz. 20c., 1/2 lb. 60c., lb. $2.00.

**ASPARAGUS.**

Barr’s Philadelphia Mammoth Asparagus. Everybody who ever saw this highly valuable variety pronounces it many times superior to any other known sort. It is beyond question the finest, largest, earliest and most productive for the market gardener to grow. Stalks frequently measure two inches in diameter, and even when twelve to fifteen inches long are perfectly tender. The quality is exceedingly fine, growth rapid, and remains in good, tender condition several days after being ready to cut. It is very productive, throwing up a perfect mass of very large size stalks of medium green color and very handsome appearance, and invariably commands a much higher price than any other variety. Since our introduction of this variety, we have frequently been sold out before the season was half over, so great has been the demand for it. So we request our customers to place their orders with us as early as possible. Pkt. 5c., oz. 10c., 1/2 lb. 75c., lb. 75c., 5 lbs. $2.25; 2-year old roots per 100, 75c., 1000 $6.00, 100 roots by mail post-paid $1.25.

Conover’s Colossal Asparagus. A good standard variety. Oz. 5c., 1/2 lb. 75c., lb. 40c.; 2-year old roots, 100 60c., 1000 $4.50, 100 roots by mail post-paid $1.00.

Donald’s Elimiya Asparagus. For some years past the city of Elmira, New York, has had the reputation of having on sale the finest and largest asparagus grown in the State. This asparagus has attracted the most attention from dealers and commission merchants generally throughout the State, all anxious to get it. The color is notably different from either of the famous Barr’s Philadelphia Mammoth or Palmetto, while the stalks are more tender and succulent. Its mammoth size can be realized from the fact that in whole crops five stalks will average a pound in weight. Our seed and roots are direct from Elmira, New York. Price of seed, oz. 15c., 1/2 lb. 25c., lb. 75c., 5 lbs. $2.00; 2-year old roots per 100, 75c., 1000 $7.00, 100 roots by mail post-paid $1.75.

Palmetto Asparagus. A large growing, bright green productive sort, quite early, from South Carolina. Oz. 10c., 1/2 lb. 25c., lb. 75c., 5 lbs. $2.25; 2-year old roots per 100, 75c., 1000 $6.00.

**NOT ONE FAILED TO GROW.**

John Slink, Cincinnati, O., July 2, 1893.— The 4000 roots of your Mammoth Asparagus you sent last March were the freshest looking and best packed lot of roots I ever saw. I paddled them before setting out, and, thanks to your careful digging and packing, not one failed to grow.

**EGGS FOR HATCHING.**

- **BOSTON IMPROVED.**

Round Pod Extra Early Red Valentine Bean. Market gardeners will unquestionably find this a great improvement over all existing sorts of Red Valentine Beans and a fine early snap-short green pod bean for local market or shipping purposes, it being fully ten days earlier than the old Early Red Valentine, and will often pick thirty-five days from time of planting.

The pods are smooth, round, strong-willed, thickly set, remaining tender a long time after being fit to pull, which is a very valuable feature, and have a peculiar rich delicious flavor. Habit of vine, dwarf, very uniform, making little top growth, ripens uniformly, producing an enormous yield. The demand for this variety last season over the previous year was 115 per cent. Pkt. 10c., oz. 20c., 1/2 lb. 50c., 1 lb. $1.00, pk. $2.75.

NEW CHAMPION LATE FLAT DUTCH CABBAGE

We know this to be the finest strain of Late Flat Dutch Cabbage Seed ever offered, and we have gone to much trouble and expense to bring it to the present high standard. It is all head, always sure to head, and will produce a greater weight of cabbage from a given space than any other sort. The heads have scarcely any outer leaves, are remarkably uniform, solid, of fine texture, have a short stem, and usually weigh from ten to thirteen pounds. It is very sweet flavored, keeps well, is an excellent shipper, withstands drought well, and is without doubt the finest late cabbage for the Market Gardener and consumer that we have ever seen during our thirty years experience. No variety can approach it for fine quality and uniform reliability to produce solid, firm heads of good size during the most unfavorable weather.

From all parts of the country we have received expressions of unanimous praise, and we could fill many pages with testimonials from thousands of Market Gardeners who grew it the past two seasons. If you haven’t had it, don’t fail to get it.

Pkt. 10c., oz. 35c., 1/2 lb. $1.00, lb. $3.75, 2 lb. $7.50.

NEW CHAMPION LATE DRUMHEAD.

Our customers will find this the most reliable heading cabbage of the drumhead type in existence, out to 50 prime marketable heads out of a hundred is an average yield. Mr. Champion held this seed at $15.00 per pound when he grew it in small quantities for local sales. It is a medium, early and late variety, being about ten days earlier than our celebrated Champion Late Flat Dutch. Heads firm, medium size, fine grain and of a very delicate quality, sets very close to the ground, outer leaves few and grow close to head, stands heat and drought well, very hardy, and an excellent keeper. Pkt. 10c., oz. 35c., 1/2 lb. $1.00, lb. $3.75, 2 lb. $7.50.

Moore & Simon's Lightning.

Extra Early.

The Earliest of All Peas.

The pods are large, of a beautiful shade of green, and well filled with large smooth peas of splendid flavor, very sugary and tender. The fact that they are grown 89 miles farther north than any other stock, insures them to be the hardiest, earlier, more productive and less vine than those grown in New York or Lower Canada.

Our Lightning Peas will be found especially valuable to Market Gardeners, for the reasons named above.

Simon's Fillbasket

Introduce by us in 1890, this grand new Pea has been very much admired. The illustration hereewith shows a pod engraved exactly natural size. The vines are of short, sturdy growth, 2½ to 3 feet high, of a decidedly branching character, and bear an enormous crop of magnificent large dark green round pods, each containing eight to twelve peas, of remarkable size and very rich and sugary flavor. It has been appropriately termed the "Fillbasket," on account of the extraordinary quantity of large pods that it produces. We have had many letters in praise of its great productiveness, the extra large size of pods, and the delicious quality of the peas. It is unquestionably the best new Pea recently introduced. Pkt. 10c., pkt. 10c., qt. 25c., ½ pk. 1.00, pkt. $1.75, bu. $6.75.

SOLID: IVORY

FORCING RADISH

The only Perfect White Variety

for Greenhouse and Sash Growing.

It is entirely distinct from any other white turnip variety. Its points of superiority are remarkably short top and rapid growth, perfect globe turnip shape, short and very small tap root, extra fine quality and showing no disposition whatever to become puffy with age, remaining solid and juicy long after fully grown. Owing to its very short leaves it can be grown very closely in the row without causing the leaves to "draw." Pkt. 5c., oz. 15c., ½ lb. 30c., lb. $1.25.

New Fireball Radish.

Improved New Fireball. This is unquestionably the best red forcing variety for growing under glass; also very desirable for outdoor planting. Will mature in thirty days, and can be grown very thickly in the row; unlike other sorts it stills well throughout the year. Should be pulled when not more than two-thirds grown. Oz. 10c., ½ lb. 20c., lb. 75c.

Improved New White Strasburg. Our stock of this excellent summer sort is better than ever before, the skin and flesh are of an almost transparent white, very tender and a delightful pungent taste; remains in a tender condition unusually long. Can be pulled in thirty-five days from time of sowing. The top being small it can be grown very close, this making it very productive and profitable. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 70c.

White Strasburg. Very fine, early and summer sort. Oz. 5c., ½ lb. 20c., lb. 60c.

This is the finest of the Savoy class and very distinct from all other sorts. Heads large, very compact, solid and deliciously tender and sweet, and well adapted for either early summer or late autumn and winter crop. Surpass all other sorts in hardness and keeping qualities. Entire "pits" of it will keep in perfect condition until May.

Walter P. Felton, Conshohocken, Pa., writes:—*"I have grown all the advertised kinds of Savoys, but found no other half so good a keeper, it being in good market condition the 15th of May. It also differs from all other kinds of Savoys in making heads as hard as a rock, standing late frosts in the field better than the Lee or Marvin strains. Its rich, sweet flavor and fine curly, netted look, causes it to outsell all other varieties."

_pkt._ 1 oz., 5 oz., oz. 35c., ½ lb. $1.00, lb. $3.00.

**IMPORTANT NOTICE.**

We have, as in many previous years, again purchased the entire stock of seed of the handsome King of the Earlies Beet from Mr. Lower, the Raiser.

**THE FAXON SQUASH.**

A distinctive feature of this squash is that the ripe squashes vary in color, some of them being pale yellow with still paler yellow stripes in hollows, while others are green, mottled and faintly striped with a lighter green.

The flesh is a deep orange yellow, cavity very small and seeds few; the special peculiarity, however, is that, while uncooked it appears to have a shell like any squash, when cooked there is practically none, the shell or inedible part being only about as thick as a sheet of writing paper. It is the best squash we ever tasted—sweet and very dry—and for squash pies it must be tried to be appreciated. We know a trial will convince all of its great value.

It matures early and can be used as a summer squash. It is the best winter variety we know of, being a very late keeper. It is the only squash we ever saw that every specimen is of superior quality, without regard to size, or whether it is ripe or green. This is a very desirable feature; every specimen can be gathered and used.

*Very early, enormously productive, of medium size and the best possible quality.* _Pkt._ 1 oz., oz. 40c., ½ lb. $1.25.

**NEW MODEL SUMMER CABBAGE.**

In the illustration we display what we consider—as well as all those whom we sold it to last year—the finest summer cabbage in existence, whether for medium early, main crop or winter use—the New Model Summer Cabbage. We class it as a second early sort, coming in a few days after our improved Early Summer, but immensely superior, being nearly double the size, with no tendency whatever to run to seed.

We say, without exaggeration, that it is the finest cabbage in existence to-day, and for summer use it has no equal. It is the cabbage in every respect for the market gardener or private planter, being large in size, handsome in color and of the finest quality. It is, in all probability, the most profitable sort to plant, as a crop is sure, no matter when planted. All our varieties of cabbages have for many years been the acknowledged standard of excellence by everyone interested in this important seed. For compact growth and solidly and fine quality, it is without a peer; and, as Mr. William S. Lippencott, of Morton, Pa., writes us, *"It is the most rapid selling and satisfactory cabbage I ever grew."*_ _Pkt._ 1 oz., ½ oz. 20c., oz. 35c., ½ lb. $1.00, lb. $4.00.

CHIVES.

Chives are perfectly hardy little members of the onion tribe, and are grown exclusively for their tops, which are used wherever the flavor of onion is required. They appear very early in the spring and can be shorn throughout the season, hence this valuable little plant should have a place in every garden. Large clumps 10c. each, 1oz. $1.00.

SUTTON'S "GOLD MINE" TOMATO.

As its name indicates, this is the tomato for profit. It is indeed the best of all for color, shape, size, quality and productiveness. Mr. William Sutton, of Gloucester County, N. J., from whom we have obtained our supply of seed, and which we now offer to the public for the first time, found it growing among a field of Livingston's Beauty about seven years ago. He has been growing it for five years, both as main, early and late crop. His neighbors pronounce it a veritable "gold mine," owing to the fact that it out-yields and out-sells all other sorts sent to the Philadelphia markets. Fruit is of a rich cardinal red, extra large in size, and the size of the fruit is maintained to the end of the season. It is a remarkable good shipper and fine keeper, being very solid and firm. The quality is peculiarly fine and it is decidedly the best tomato for the market gardener or amateur ever grown. Pkt. 15c., 2 pkts. 25c., oz. 50c., lb. $1.50.

LOWER'S KING OF THE EARLY BEETS.

Mr. Thomas Lower, an old resident and successful market gardener, and a highly respected citizen of Philadelphia, has for many years been noted for always having beets in market from five to ten days earlier than any other local grower. He has accomplished this only by having an earlier strain of seed than his neighbors, which has been in his possession for a long time and which he produced by repeated crossing and very careful selection. The color is a handsome red, skin smooth, quality tender and rich; foliage small and short, rendering it well adapted for growing under glass and unsurpassed for sowing on warm borders. We have purchased the entire stock of seed from Mr. Lower, and will now offer it to the public for the first time. Oz. 10c., 1/2 lb. 30c., lb. $1.00, 3 lbs. $4.00.

MOORE'S QUICK SELLING RADISH.

The seed of this new variety was originally sent to our Mr. Moore by a friend residing in China. Samples of the seed were distributed for trial among some of the leading radish growers, with the general verdict that it was the "quickest selling radish" they ever had; hence we named it "Quick Selling Radish." Our illustration shows its natural size and shape. The color is a very brilliant and attractive red, flesh very crisp and tender; usually matures in twenty-eight days from time of sowing. It is the most valuable new radish introduced for many years. The appearance is at once striking to all, and it should be grown by every market gardener and amateur. Pkt. 10c., oz. 15c., 1/2 lb. 40c., lb. $1.25.
Best of All Extra Early Market Bean.

This fine new variety has numerous advantages over all other green-pod sorts. The pods are of a light green color, long and perfectly round, solid flesh, very tender and stringless. In earliness it is ahead of the Mohawk, and in productiveness it excels all other sorts. The pods are borne in thick clusters well up under the foliage; this fact renders it of great value for fall planting, as the thick heavy foliage that protects the pods from frosts. Repeated tests have proven it to be much harder than the Valentine, which enables it to be planted much earlier than the later sorts. Market gardeners will find it a very profitable sort to grow. Pkt. 25c., pt. 50c., qt. $1.00, lb. $3.00.

NEW MUSKMELON—GREEN-FLESHEd OSAGE.

The Green-Fleshed Osage is the result of several years' careful selection, being a sort to which our attention was called by fineness of grain, intense sweetness and the bright-green color of flesh. It is very hardy and very prolific, and in size and shape is very like the Red-Fleshed Osage, but is bright green before ripening instead of the black-green of the Osage. In ripening it turns to a bright yellow, retaining its green color in the grooves, while its flesh becomes a beautiful pea-green. We have had ample opportunities of noting its quality, and in our judgment it is superior to any other green-fleshed muskmelon in quality, while in closeness of grain it has no peer in its class. It is sure to take its place at the head, Market gardeners and shippers of fine melons should plant the new Green-Fleshed Osage. Pkt. 25c., oz. 50c., ½ lb. $1.00, lb. $3.00.

**FARM SEEDS.**

**A NEW FIELD CORN.**

**THREE 100-DAY BUSTLE.**

The largest Early, Earliest Yellow Dent Corn in the world.

This grain is a bright golden yellow, large, broad and deep, the cob is small considering the size of the ear; in fact, it is a perfect variety in all respects, and will produce as much fodder and more corn than the famous Chester County Mammoth and other late varieties which require three to four weeks longer to ripen. It is wonderfully productive, one hundred bushels to the acre being no uncommon yield. Prices of extra selected seed, shelled: 4 qt. 90c., lbs. 75c., bush. $2.25.

**WELCOME OATS.**

The grain is very plump and full, with thin, close-fitting hanks. They weigh forty-seven to fifty-one and a half pounds per hundred bushels on hand. Their uniform success in every part of the country proves their general adaptability to our varied climate. It ripens in seven to two weeks ahead of other oats, and on this account yields splendid crops, even in the extreme South, where few other varieties grow to advantage.

The immense productiveness of the Welcome Oats is explained by their wonderful stiffness (often forty to seventy-six stalks from a single grain planted), the great size of the heads, and the heavy weight of the grain. It will be seen that they should not be sown nearly as close as others. Pkt. 10c., lb. 30c., 3 lbs. 75c., postpaid. Per peck 50c., per bushel (of 32 lbs.) $1.10, 10 bushels and over at $1.00 per bushel, bags free.

**EARLY MASTODON CORN.**

A new early Dent variety, originated in Ohio. The ear is very large, and the grain fine. It grows strong, and is quick, and very few ears shelling green, 'being pure Dent, of two shades of white and yellow. In the American Agricultural corn contest of 1885, it outyielded all others, making the wonderful record of two hundred and thirteen bushels shelled corn to the acre. Pkt. 10c., lb. 30c., 3 lbs. 75c., postpaid. Qt. 15c., peck 60c., bush. $1.75, bag of 2 bush. $3.25, 10 bush. and over, $1.50 per bush., bags included.

**CHESTER COUNTY MAMMOTH.**

Wherever introduced has given universal satisfaction, both on account of its large yields, fine quality of grain and superior fodder. The ears are large and well formed, grain very large and deep, and of a bright yellow color; the stalk is large, averaging from ten to fourteen feet, producing a large quantity of fodder than any other yellow corn. Our stock has been improved each year, by the most careful and skilful selection of the largest and earliest ears. By mail, postpaid, pkt. 10c., 30c., 3 lbs. 75c. By express or freight, bags included, qt. 15c., peck 60c., bush. $1.75, bag of 2 bush. $3.25, 10 bush. and over, $1.50 per bush., bags included.

**MAMMOTH RUSSIAN SUNFLOWER.**

The Giant of all Sunflowers, Growing to double the size of the common sunflower, and the yield of seed is twice as great. One hundred and twenty-five bushels to the acre have been grown at a loss expense than corn. It is highly recommended for poultry; the best egg-producing food known. The seeds make splendid fodder, much relished by all kinds of stock. The seed is good feed for horses, and yields a fine quality of oil. The strong, thick stalks are used for fuel. Qt. 5c., qt. 10c. (qt., postpaid, 35c.), peck 75c., bush. $2.50, sack, 2 bush., $4.00.

**WEBER’S IMPROVED EVERGREEN.**

Best and Purest Broom Corn in Cultivation.

This is the best and purest in cultivation, being superior for length, strength and beauty of bloom and stalks. It is a very bright green color and a slight reddish tinge. It makes by far the best brooms of any other corn; height seven to eight feet. Qt. 10c., peck 50c., bush. $3.00, 2 bush. $5.50. Dwarf Evergreen Broom Corn. Grows three to four feet high, straight, smooth brush. Qt. 10c., peck 85c., bush. $2.25.

**MANSHURARY BARELY.**

The earliest and most productive. Qt. 20c., peck 60c., bush. $2.00.

**SEED BUCKWHEAT.**

New Japanese. Sown at the same time with Silver-Hull, it proved two weeks earlier and yielded twice as great. The kernels are twice the size of any other buckwheat, of a rich dark brown color and manufacture a superior flour. Owing to its branching character only one-half as much seed is required per acre, while the straw is much stiffer and stands up better. This new buckwheat is rapidly displacing all others. Pkt. 10c., lb. 30c., 3 lbs. 75c., postpaid, qt. 10c., peck 60c., bush. $1.40, 5 bush. and over, $1.25 per bush., sacks included.

**Silver Hull.** Sown at the same time with the common buckwheat, this variety continues in bloom longer, matures earlier, and yields nearly double. The flour produced from it is whiter and more nutritious. Lb., postpaid, 25c., qt. 20c., peck 50c., bush. $1.50.

The dianthus or Chinese pink has long been a great garden favorite. It is, in fact, one of our most useful plants, furnishing abundance of gay and pretty flowers all winter, grown within the earth and covered by draping snows. They live over winter and bloom as well the second year as the first. They are quite as pretty for pot plants in the house as carnations; indeed, their variety of color is more varied and pretty, while they are finer bloomers. As pot plants the dianthus will always give great satisfaction, and as a garden flower they are among the very best. Plants from seed grow and bloom very quickly.

THE CINNAMON VINE

("The most desirable climber in cultivation.")

A beautiful and rapid climber, possessing the rare quality of emitting from its flowers the delightful odor of cinnamon, and very appropriately called the cinnamon vine. Three to four feet in an autumn order. The plants are grown for cuttings or vines and are very nice for window ornaments, or door or porch decoration.

The vines often run 25 feet or more, and when trained over and about a door or window, make an ornament much admired, while its many clusters of delicate white flowers send out an amount of fragrance that is truly wonderful. It is easy to cultivate, has no insect enemies, and is not affected by drought, because it can root so deeply. You should surely order a liberal number of the cinnamon vine. They are most easily grown, and once planted will last a lifetime. Your arbor, window and veranda will all be incomplete without this charming climber. There is nothing that will give home a more handsomer and easy appearance, than a carmine vine.
